## Product Catalog

### Geotextiles and Erosion Control

**Filter Cloth:** Typically made from polypropylene or polyester, **geotextile fabrics/Filter Cloth** comes in three basic forms: **woven** (resembling mail bag sacking), **needle punched/non-woven** (resembling felt), or **heat bonded/non-woven** (resembling ironed felt).

Image	Item Number	Description	Size	Spec	Price
	<b>Woven Stabilization Fabric (Marv)</b>				
Can be used for stabilization, separation, reinforcement, and erosion control applications. Woven geotextile fabrics strive to provide dimensional stability and deliver superior load distribution.					
	<b>NSW150600</b>	150#(grab tensile)	12.5'x432'(600sy)		
	<b>NSW200</b>	200#(grab tensile)	12.5'x432'(600sy)		
	<b>NSW20015360</b>	200#(grab tensile)	15'x360'(600sy)		
	<b>NSW200W</b>	200#(grab tensile)	17.5'x309'(600sy)		
	<b>NSW315</b>	315#(grab tensile)	12.5'x360'(500sy)		
	<b>NSM706</b>	Monofilament	12'x300'(400sy)		
	<b>NSM370</b>	Monofilament	12'x300'(400sy)		

**\*Woven 200LB. fabric can also be purchased by the foot.**

	<b>Nonwoven-Drainage/Filtration (Marv)</b>				
Needle-punched to provide excellent strength and hydraulic characteristics necessary for ground stabilization, drainage, and erosion control applications.					
	<b>NS3</b>	Pipe Wrap 3oz 80#(grab tensile)	3'x360'(120sy)		
	<b>NS140</b>	90#(grab tensile)	12.5'x360'(500sy)		
	<b>NS145</b>	120#(grab tensile)	12.5'x360'(500sy)		
	<b>NS160</b>	160#(grab tensile)	12.5'x360'(500sy)		
	<b>2214</b>	205#(grab tensile)	12.5'x360'(500sy)		
	<b>NS180</b>	205#(grab tensile)	15'x300'(500sy)		
	<b>NS1000</b>	250#(grab tensile)	15'x300'(500sy)		

**\*Non-Woven fabric \*NS180) can also be purchased by the foot.**

**Fabric Pins:** Are a way of holding geotextile fabrics, landscape fabrics and erosion control mats and blankets in place.

Image	Item Number	Description	Size	Spec	Price
	<b>Fabric Pins w/washer</b>				
	<b>PINS12</b>	Fabric pin with washer	12" (100/box)		
	<b>PINS18</b>	Fabric pin with washer	18" (100/box)		

\*Pricing is subject to change without notice\*

**Geo-Grid:** Is a geo-synthetic material used to reinforce soils and similar materials. **Geogrids** are commonly used to reinforce retaining walls, as well as subbases or subsoils below roads or structures. Soils pull apart under tension. Compared to soil, **geogrids** are strong in tension.

Image	Item Number	Description	Size	Spec	Price
 Biaxial Geogrid	<b>Bi-Axial</b>				
	BX Geogrids have been used for mechanical ground stabilization in over half a million projects worldwide, including roads, reinforced foundations and working platforms.				
	<b>NS11GRIDT</b>	BX Geogrid 11	12.79'x328.08'(466sy)		
	<b>NS12GRID</b>	BX Geogrid 12	13.12'x164'(239.08sy)		
	<b>Uni-Axial</b>				
	UX Geogrids are used for high strength soil reinforcement in wall and slope applications.				
	<b>NS35GRIDBR</b>	Uni Geogrid	12.8'x328' (466sy)		
<b>*Other style geogrids are available upon request* (EX. TRIAXLE-TX130)</b>					

**Silt Fence:** a temporary sediment control device used on construction sites to protect water quality in nearby streams, rivers, lakes and seas from sediment (loose soil) in storm water runoff. **(Manufactured on location)**

Image	Item Number	Description	Size	Spec	Price

**Super Silt Fence:** A severe duty reinforced type of silt fence. Super Silt Fence is composed of several components. Those components include: geotextile fabric, chain link, posts, hog rings/c rings, and aluminum pre ties.

Image	Item Number	Description	Size	Spec	Price
	<b>Chain Link:</b> Woven fence usually made from galvanized or LLDPE-coated steel wire. The wires run vertically and are bent into a zig-zag pattern so that each "zig" hooks with the wire immediately on one side and each "zag" with the wire immediately on the other. This forms the characteristic diamond pattern seen in this type of fence. <b>*Other sizes available by request*</b>				
	<b>6GA25</b>	6 gauge (2-3/8" opening)	42"x25'	Baltimore Co	
	<b>2260</b>	9 gauge (2-3/8" opening)	42"x50'	MDE	
	<b>2260-72</b>	12.5 gauge	72"x50'		
	<b>Post:</b> Used on chain link fencing. Lawn & Garden. Landscape Fencing / Farm Fencing. Fencing. Chain Link Parts.				
	<b>2268</b>	N40-.131 SS40 (Heavy)	2 3/8"x6'	MDOT	
	<b>2256</b>	N20-.095 SS20 (Medium)	2 3/8"x6'	MDE	
	<b>12286</b>	N10-18gauge(ultra-light)	2 3/8"x6'		
	<b>2256-8</b>	DC Tree Post	1 5/8"x8'		
	<b>Fabric: (Logo and non-logo available)</b> Have your Company Name, Logo & Phone # Printed on all Silt Fence/super silt fence fabric. This is a very cost effective form of advertising! <b>(Manufactured on location)</b>

\*Pricing is subject to change without notice\*

**Sediment Bags:** Also known as dewatering bags, filter bags, dirt bags, etc. These bags collect sand, silt and fines, while regulating that enters streams, surrounding property and storm sewers.

Image	Item Number	Description	Size	Spec	Price
	<b>*Other sizes are made to order*</b>				
	<b>FB6X6</b>	NS Dewatering Bag	6'x6'		
	<b>FB7.5X7.5</b>	NS Dewatering Bag	7.5'x7.5'		
	<b>FB15X15</b>	NS Dewatering Bag	15'x15'		

**Hardwood Stakes:** Used for silt fencing, tree staking, and many other uses. Various sizes, all pencil pointed.

Image	Item Number	Description	Size	Spec	Price
	<b>*Other sizes are made to order*</b>				
	<b>1236</b>	Grade Stake	1x2x36" 25/Bundle		
	<b>2221</b>	Tree Stake,C42	2x2x42"	MDE	
	<b>2225</b>	Tree Stake,C60	2x2x60"		
	<b>STAKES</b>	Tree Stake,C72	2x2x72"		

**Grass Seed:** Over seeding — planting grass seed into existing turf — provides the opportunity to improve your lawn's overall look and health, thicken the turf to minimize weeds, fill in bare or damaged areas and/or convert to another type of lawn.

Image	Item Number	Description	Size	Spec	Price
	<b>*Custom blends available upon request*</b> <b>Ex. SHA Turf grass Mix, SHA Temporary Mix</b>				
	<b>ANNUAL</b>	Annual Rye	50 lb.		
	<b>2255</b>	Premium Mix	25 lb.		
	<b>2244</b>	Contractors Blend	50 lb.		
	<b>2266</b>	SHA Turfgrass	50 lb.		

**Fertilizers:** Any material of natural or synthetic origin (other than liming materials) that is applied to soils or to plant tissues (usually leaves) to supply one or more plant nutrients essential to the growth of plants.

Image	Item Number	Description	Size	Spec	Price
	<b>*Custom blends available upon request*</b>				
	<b>101010</b>	10-10-10 (Starter Mix)	50 lb.

	<b>4624938</b>	Lime Pelletized	40 lb.		

\*Pricing is subject to change without notice\*

**Hydro Seeding Materials:** (or hydraulic mulch seeding, hydro-mulching, hydro seeding) is a planting process that uses a slurry of seed and mulch. It is often used as an erosion control technique on construction sites, as an alternative to the traditional process of broadcasting or sowing dry seed.

Most often consists of water, seeds, fertilizer, cellulose fiber or wood mulch, and soil treatment agents. When sprayed onto the ground, the mulch in the mixture forms a moist protective coating for the seeds, allowing them to germinate.

Image	Item Number	Description	Size	Spec	Price
	<b>2239</b>	Hydro Mulch//Hydro-Pro 100% Paper	50 lb./40p		
	<b>DYE</b>	Hydro Green Dye Package			
	<b>TACK3</b>	Pro Tackifier III	3 lb./1 acre		
	<b>SEED AID</b>	Seed Aid-Penn Mulch-Cover Grow	40 lb./48p		
	<b>STRAW</b>	Straw Bale	Large		

**Filter Log:** Erosion Control Logs, commonly called wattles, are a very effective sediment control measure. Available in a variety of sizes: 8", 12" and 18", and 24", additional diameters are available for more severe applications. Erosion Control Logs are contained by a photodegradable netting which is designed to last at least two construction seasons.

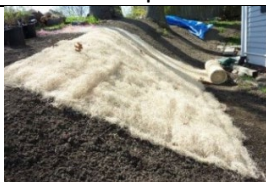

Field tested and proven, our pre-filled sock ranges from 8 to 24-inches. Each pre-filled sock contains well-aged shredded and ground hardwoods for exceptional sediment prevention. Available in UV resistant shrink wrapping or in super Sacks for tough installations.

Can be used as inlet protection, Diversion berm, perimeter control, slope interruption, and ditch check.

Image	Item Number	Description	Size	Spec	Price
	<b>111799-8X190</b>	Filled Sock (stakes included)	8"x190'		
	<b>111799X10F</b>	Filled Sock (no stakes)	12"x10'		
	<b>111799</b>	Filled Sock (stakes included)	12"x110'		
	<b>111799B</b>	Filled Sock (stakes included)	18"x55'		
	<b>111799-24x35</b>	Filled Sock (stakes included)	24"x35'		
	<b>SSFAB12</b>	Netting ONLY	1850'		

**Soil Stabilization:** We offer a full line of erosion control blankets. These products range from short term, extended term, long term, and permanent Rolled Erosion Control Products. Additionally, excelsior and straw sediment control logs, excelsior and excelsior blend mulch may be provided. Our full line of short term, extended and long term ECBs and sediment control products provide performance and longevity to meet a variety of needs. We also have a permanent line to provide outstanding value, longevity and performance in turf reinforcement.

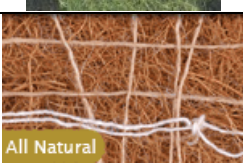

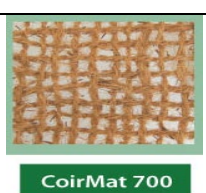

Erosion Control Blankets are biodegradable materials that can be used to protect disturbed slope and channel areas from wind and water erosion. The blanket materials are natural materials such as straw, wood excelsior, coconut, or are geotextile synthetic woven materials such as polypropylene.

**\*Other styles are available upon request\***

**Inlet Protection:** We have several different types of products that can be used for inlet protection. Our Diamond Sock (compost filter sock), GeoHay, Inlet filter mats, and Dandy products. Depending on your preference and job will determine which product will work best. These protectors can be used for construction, storm water and sediment control, industrial and landscaping uses. The most common uses are for: ditch checks, boundary protection, grate inlet filters, check dams, dewatering projects, and curb inlet filters.

	<p>Our Gutter Guard/Geo Hay/Gutter Buddy can be installed above ground and can be formed around or across the curb inlet. It is designed for curb inlets without grates where water flow is critical.</p> <p>Installed as a grate or curb inlet filter, it can be used to reduce pollutants in the storm water. With the product's ease of installation and adaptability, GeoHay has also been used on hard surfaces where installing with a stake or rebar is much more difficult.</p>				
<b>Image</b>	<b>Item Number</b>	<b>Description</b>	<b>Size</b>	<b>Spec</b>	<b>Price</b>

<b>Gabion/Reno Mattress:</b>	Are rectangular baskets made of heavily galvanized or PVC, double twisted, steel woven wire-mesh. The single unit constructed baskets are assembled, laced together and then filled with stone to form a monolithic structure.				
	Gabions and Reno mattresses are used for retaining walls, sound barriers, channel linings, slope stabilization, dams and weirs. They are particularly effective in restoring the environment and promoting vegetation growth.

**Flagging Ribbon:**

Weatherproof Poly Vinyl Chloride For Harsh Outdoor Conditions. Bright, Fade-Resistant Color For Maximum Visibility. Constructed Of Non-Adhesive, Non Conducting Vinyl. Used In Applications Such As Construction, Landscaping, Excavating, Identification Of Trees Or Hazards, And Locating Underground Cables Or Pipe.  
1-3/16" Wide, 2 Mil Thick.

150' Lengths:(5499454) Pink,(20931) Flo Green/Lime, (4084182)Flo Red  
300'- Lengths: (20912)Yellow, (20910)Blue, (5499512)Orange, (16486090)White

**Flagging Stakes:**

Bright colors for maximum visibility. Durable compounds resist fading. Each flag is 2.5"x3.5"x21". 100 per pack

Various Colors:

(4683173 Flo Green/Lime) (8046328 Pink) (8826620 Blue) (1456227 Flo Red) (2912020 Orange) (2770675 White)

**Pro Braided Chalk Line:** Line Reel Made Of Durable Polyethylene With Rewind Hand Crank Or Auto Wind With Power Screwdriver. Reload Rolls Of Line Easily, Adjust To Different Lengths Of Cores; Fits All Line With 1" Cores From 4" To 6" Long And Line Secures In Convenient Notch. Quality #18 Twisted Or Braided Nylon Line.

250' String Line with Reel-(7314214-pink) (8423428 Orange)  
500' String Line with Reel- (1586007 Pink) (5770474 Orange)  
500' Refill- (7029390 Pink)  
540' Refill- (6758494 Orange)

	<b>GVWA</b>	Gravity Wand Applicator	5 lbs.		

**Load Support Grid:** Provides superior support to your pavement system. The system confines materials and prevents lateral movement away from the applied load. The stabilizer grid acts as a large mat, by spreading the load over an extended area while increasing the load bearing capacity of the pavement surface.
